

# Working with data project

## Dashboard: Malaria Deaths in Africa: 2000-2014

### Insight 1: Kenya has the highest average of deaths over time

Based on the dashboard, I clicked on Kenya on the map, and the bar chart shows deaths due to malaria for each year from 2000 to 2014. Before 2011, The average of deaths per year was about 41177, and the highest record of deaths was 51842 in 2003. After 2010, starting in 2011, the average number of deaths per year was reduced to about 583.

### Insight 2: Democratic Republic of the Congo has the second highest average of deaths over time

Based on the dashboard, I clicked on the Democratic Republic of the Congo on the map, and the bar chart shows deaths due to malaria for each year from 2000 to 2014. Before 2004, The average of deaths per year was about 1853, and the lowest recorded deaths was 416 in 2001. After 2003, starting in 2004, the average number of deaths per year increased to about 20057, and the highest record of deaths was 30918 in 2013.

## Malaria Deaths in Africa: 2000-2014

Which countries are most affected?

How have the number of malaria deaths changed over time in Democratic Republic of the Congo?

### Insight 3: Algeria has the lowest average of deaths over time

Based on the dashboard, I clicked on Algeria on the map, and the bar chart shows deaths due to malaria for each year from 2000 to 2014. Over all these years, the average of deaths per year in Algeria was about 1, and the highest number of recorded deaths was 5 in 2010.
